*Vi tillverkar allt för lagring,
vägning, dosering, blandning
och transporterering inom jord-
bruk och industri.*

The **Unik 2000 Small** silo with its small size fits even in tight areas and is suitable for delivery of 3 ton feed posts.

Unik 2000 Small is, just like the bigger Unik-silos, manufactured in Aluzink steel sheets and has 7 year warranty.

The same basic concept is followed with dust free filling through the cyclone. The silo is also equipped with a hopper for massflow (= minimum separation during emptying).

Unik 2000 Small is a silo which preserves both the feed value and quality which is absolutely vital in the food production of today.

All of the Unik 2000 silos are manufactured to meet the standard quality criterias set up for the feed handling on the farm.

Massflow and cyclone filling give the following advantages:

- Best hygiene, -first in, first out
- No feed separation
- Natural ventilation minimizes condensation forms

Model	Volume m ³	Height m	Dia m	Weight kg
UNS-6	6,3	5,33	1,88	380
UNS-9	8,9	6,29	1,88	450
UNS-12	11,5	7,25	1,88	520
